Fri, 15 Feb 2019 23:05:00 GMT coupling and cohesion in software pdf - In software engineering, coupling is the degree of interdependence between software modules; a measure of how closely connected two routines or modules are; the strength of the relationships between modules.. Coupling is usually contrasted with cohesion. Low coupling often correlates with high cohesion, and vice versa. Low coupling is often a sign of a well-structured computer system and a ... Tue, 19 Feb 2019 03:20:00 GMT Coupling (computer programming) - Wikipedia - In computer programming, cohesion refers to the degree to which the elements inside a module belong together. In one sense, it is a measure of the strength of relationship between the methods and data of a class and some unifying purpose or concept served by that class.
